

SoftImpact STUDIO

Premium Hitting Mat for Golf Simulators

Real-Turf Strike, Less Shock

SoftImpact Studio is a premium hitting surface engineered for golfers who demand authentic fairway feedback without punishing their joints. It delivers true ball-first contact, punishes fat shots like real turf, and keeps launch-monitor numbers accurate—all while reducing impact stress on wrists and elbows.

Perfect for: High-traffic simulator bays, golf academies, driving ranges, and premium home installations.

Why SoftImpact Studio Stands Out

Authentic Turf Feedback

Mimics natural fairway behavior. Fat shots are penalized, clean strikes feel crisp, and the club moves down-and-through with realistic resistance—just like hitting off real grass.

Joint-Friendly Impact

Cushioning with tall and dense pile absorbs impact force on your body while maintaining ball feedback accuracy. Golfers can practice longer with less fatigue and strain on wrists and elbows.

Launch Monitor Accuracy

Engineered to deliver consistent, true ball reaction. Data from SoftImpact Studio matches on-course ball flight characteristics, so your shot data is reliable for swing analysis and improvement and takes a real tee.

Built for High Traffic

Reinforced construction withstands thousands of strikes per week. Durable nylon fibers maintain surface consistency, and the replaceable hitting zone ensures long-term performance without degradation.

Premium Specifications

Specification	Details
Product Name	SoftImpact Studio
Surface Type	35mm high density nylon
Pile Specs	9600 dtex, 3/8inch guage
Product Weight	134.5 Oz/sq yard
Recommended Use	Golf simulators, bays, ranges, academies
Playing Surface	Realistic fairway-feel striking zone
Impact Cushioning	Advanced Shock Absorption with cushion underlay
Ball Flight Accuracy	Enables fairway like ball flight
Durability	Replaceable hitting zone for extended lifespan
Maintenance	Minimal—regular surface brushing and cleaning

Key Benefits

- ✓ **Realistic strike feedback** – Fat shots penalized, clean contact rewarded
 - ✓ **Accurate ball data** – Launch monitor readings match real on-course performance
 - ✓ **Reduced joint impact** – Practice longer, train harder, recover faster
 - ✓ **Professional durability** – Built for high-traffic commercial use
 - ✓ **Long-lasting performance** – Replaceable hitting zone extends mat life
 - ✓ **Immediate installation** – Fits standard simulator bay footprints
-

Use Cases

Golf Simulator Studios

Premium experience that attracts serious golfers and keeps them coming back. Members appreciate authentic swing feedback and reduced body fatigue during extended sessions.

Golf Academies & Coaching

Instructors need accurate ball flight data and realistic turf feedback to teach proper strike mechanics. SoftImpact Studio delivers both, with confidence in every swing being analyzed correctly.

Driving Ranges & Practice Facilities

High-volume traffic demands durability and consistency. SoftImpact Studio handles hundreds of strikes daily while maintaining premium feel and launch monitor accuracy.

Premium Home Installations

Serious golfers investing in home bays want the same quality as top-tier commercial facilities. SoftImpact Studio brings professional-grade strike feedback to personal practice spaces.

Maintenance & Care

SoftImpact Studio is designed for minimal upkeep:

- **Daily:** Light brushing to clear debris and maintain surface texture
 - **Monthly:** Inspect to assess hitting zone wear
 - **As Needed:** Replace hitting zone
-
